### German Capital Markets

German capital markets have overcome the worldwide financial crisis of the years 2008 and 2009 surprisingly quickly. They still belong to the most powerful ones in the world. They provide a wide range of business opportunities for both German and foreign securities issuers and financial service providers.

The legal framework for issuers and financial service providers in German capital markets is strict, and therefore guarantees their reliability. During the webinar presentation, Atty. [Martin D. Sach](#), LL.M., WINHELLER Attorneys at Law, Germany, will give you an overview on this framework and the different ways to meet its requirements.

- German stock exchanges and their market segments
- Requirements for issuing securities (prospectus, paid-in capital and annual statements)
- The application process with the Financial Services Supervisory Authority (BaFin)
- Ongoing compliance for securities issuers and financial service providers

Lee](#), Partner, and [Margaret T. Perez](#), Associate, at Diaz, Reus & Targ, LLP, an international law firm based in Miami, Florida, with an office in Shanghai, China, P.R.C., will be presenting an overview of the benefits of acquiring capital in the Chinese market.
